About Al-Fayha Group

Our founders established the business in 1921 as the foremost in the field of General Trading in the city of Basra. In 1954, as the company continued to grow, the founders expanded their business to Baghdad, the capital of Iraq. In 1991, the Group extended its activities to include various industrial fields in response to the opportunities emerging from the reconstruction and the rebuilding of the country's infrastructure.

Our Objectives

The Group's objectives are to contribute in the building of Iraq and to support the construction's efforts of its infrastructure.

Al-Fayha Group is determined to achieve these objectives by adapting the latest international standards, utilizing cutting edge technologies and modern machineries in this endeavour.

The Group always aspires to be the first choice of its customers and the market leader by continuously exceeding the customer's expectations.

Ur Dry Dock

Al-Fayha Group is proud to mention the construction of the first dry dock in Iraq, the Ur Dry Dock (W19m, D 4m and L100m) in Basra near Abu Floos Port, as one of its major projects in the maritime sector. The project was carried out by the National Contracting Co., an affiliating of Al-Fayha Group, throughout 2001-2005.

The capacity of the dry dock is up to 4,000 tons , and functions as a center for maintenance and servicing of vessels in the Shatt Al-Arab area.

The total area of the project is 50,000 m² with 2,500 m² building areas. The dock dimensions are 90 m in length, 4 m in depth and 19 m in width. Dry docks are used for the construction, maintenance and repair of ships, boats, and other watercrafts.

The project included implementation of pavement using tubular piles and cross bridges with a link bridge of 1 m in depth and with a side walk of 100 m in length and 12 m in width.

Precast concrete products were used to cover all sides of the docks.
